

Supportive Environments
for Healthy Communities

USAID
FROM THE AMERICAN PEOPLE

What is WASHplus?

The **WASHplus** project supports healthy households and communities by creating and delivering interventions that lead to improvements in access, practices, and health outcomes related to water supply, sanitation, and hygiene (WASH) and household air pollution (HAP). This five-year project funded through USAID's Bureau for Global Health, uses **at-scale programming** approaches to reduce diarrheal diseases and acute respiratory infections, the two top killers of children under five years of age globally. WASHplus can **integrate** WASH and HAP activities into existing education, HIV/AIDS, maternal and child health and nutrition programs and build strong in-country **partnerships** to increase impact. In addition, WASHplus is charged with promoting and exploring **innovation** in the WASH and HAP sectors.

Who We Are

WASHplus is a cooperative agreement managed by the FHI 360 in partnership with CARE and Winrock International, joined by a diverse set of NGO, university, and private sector resource partners. The WASHplus partnership's range of expertise includes:

- Supporting at-scale sanitation initiatives
- Programming rural and urban water supply interventions for domestic and productive uses
- Testing and enhancing cookstoves and associated behaviors to improve household indoor air quality
- Building public-private partnerships for enhanced sustainability
- Incorporating comprehensive behavior change approaches that consider policy, products, and people's preferences

What We Do

WASHplus provides support to USAID missions and bureaus to meet their strategic objectives and targets through:

- At-scale program implementation
- Creative and effective program design that builds on or integrates into existing programs
- Targeted short-term technical assistance
- Research design and evaluation of a range of environmental health activities

Where We Work

- Bangladesh
- Benin
- Burkina Faso
- Mali
- Nepal
- Zambia

WASHplus Resource Partners

Field Implementation

- WaterAid
- International Development Enterprises
- Water & Sanitation for the Urban Poor
- Task Force for Global Health
- Berkeley Air Monitoring Group
- Practica Foundation
- Building Partnerships for Development in Water and Sanitation

Knowledge Management

- SecondMuse
- IRC

Innovation and Operations Research

- MIT D-Lab
- IDEO
- University of California/Berkeley
- Aprovecho
- London School of Hygiene and Tropical Medicine

Finance

- Water.org
- Women's World Banking

PPP

- Unilever
- Procter & Gamble
- Medentech
- Envirofit
